

# Your Technology Partner

Welligent was established after developing a custom health software for the Children's Hospital of The King's Daughters in Norfolk, Virginia. Since then, Welligent has implemented nearly 150 EHR installations in 28 states across the US. Today, Welligent employs staff across the country, with two offices located in Virginia. Our responsiveness to customers sets us apart from other vendors. We are easy to reach, 24x7, and we deeply value the many long-term relationships we've developed over the last 15+ years. We have an unwavering dedication that shows through continuous software development, on-going training and open communication. At Welligent, we're dependable. Dollar for dollar, no other vendor can match our technology's security, reliability and speed.

## "We Chose Welligent!"

"Our implementation of Welligent led to massive time savings for clinical staff, improved billing processes and overall improved efficiency. Prior to Welligent, we were unable to efficiently coordinate care. Now we can."

**Chris Howard, IT Director**  
Foothill Family, CA

## Cloud EHR

Welligent's ONC-HIT certified EHR is cloud-based, providing all the tools you need for documentation, billing and reporting. Our Meaningful Use II approved EHR is configurable for behavioral health, foster care, residential, substance abuse and student health providers. Welligent successfully serves each of these markets. Key EHR features include: call tracking, scheduling, session notes, incident tracking, medication management, e-prescribing, education and employment tracking, reporting and discharge procedures. Additionally, Welligent offers a variety of billing services through Change Healthcare, formerly Emdeon.

## Mobile Apps

### Mobile EHR App

Welligent Express is a streamlined mobile version of our desktop EHR. The app is available on Android and Apple platforms and can be used with tablets and smartphones. You can schedule appointments and manage client records, session notes, meds, assessment tools and pay sources, even in offline mode.

### User Community App

Welligent Community is a virtual resource for Welligent system support, peer-to-peer engagement, industry news and thought leadership. Users can stay informed about Welligent updates, new developments and system enhancements.

### Instant Messenger App

Welligent Chat enables EHR users to message each other in real time. This instant chat app simplifies staff communication in busy behavioral health settings.

## Engagement

Welligent's Consumer Portal allows clients and parents to access and edit their own health records. The portal allows clients to create their initial record, upload documents and access announcements about appointments, invoices and test results. The Consumer Portal also enables clients to pay invoices, request and cancel appointments and request medication refills.

# At Welligent, You're Family

We're good listeners. We're responsive to your needs and suggestions, and that's reflected in our free quarterly product upgrades. This year, Welligent introduced Welligent V8. This major EHR enhancement contains an entirely new user interface design representing Welligent's new family of colors and styles. But more than a fresh look, V8 provides new software features along with enhanced application navigation and usability features including:

- New instant messaging enables users to chat with each other in real time
- Welligent ScanDirect enables document scanning directly into Welligent from any USB-compatible desktop scanner
- Extensive enhancements to existing modules enables the same actions with fewer clicks
- Improved navigation and menu systems with quicker search and record retrieval
- A complete foster care module makeover for managing everything from recruitment to adoption

## Security

Welligent hosts your data on the same world-class Oracle platform as 97% of Fortune 500 companies. Our primary and backup data-hosting sites are chosen based on low incidence of natural or man-made disasters, so your data is safe from catastrophic data center loss. All data is fully encrypted and HIPAA compliant. Our data centers have unlimited network bandwidth, 24/7 onsite security personnel and SSAE 16 annual audits. Your data is only accessible by approved personnel within your organization. Additionally, Welligent employs 24/7 active monitoring to ensure your data is safe and secure.

## Complete EHR

Increase productivity and efficiency by using Welligent's complete ambulatory EHR that offers the following features:

- Call center for scheduling appointments, tracking referrals and submitting insurance and intake forms
- Documentation of intake, individual and group session notes, referral sources and discharge procedures
- Primary care and lab results tracking
- Access to Wiley treatment planning libraries and printable online diagnostic resources
- ePrescribing and medication management
- Complete billing and accounts receivable module
- 1,000+ pre-built reports and customizable reports at no additional cost
- Free quarterly releases with system enhancements and new system functionality

## Community

We believe good communication leads to great results. Welligent Community is an online communication platform allowing our customers and staff to share tips, tricks and other ideas. From technical documentation to peer-to-peer message boards, Welligent Community offers the resources for every user to become a super-user. Join the Welligent Community today!
