

Welligent Express. Mobile EHR.

People are consistently connected to mobile devices. From checking social media and bank accounts to playing games and ordering food, everything is just a click away. Your clients' health records should be no different. With Welligent Express, your EHR is accessible wherever you are—whether you're in the office, the community, a hospital or school setting. Your scheduling, documentation, billing information and medication management are accessible from your desktop, tablet or smartphone. Welligent Express is available on both Android and Apple platforms. Spend more time with your clients and less time catching up on documentation.

No WiFi? No Problem.

With Welligent Express, you can go offline in the morning and stay offline all day. Access your client records, forms, medications and pay sources all without an internet connection. Document your notes as usual and sync your data the next time you have internet access. Welligent Express is your key to increased productivity.

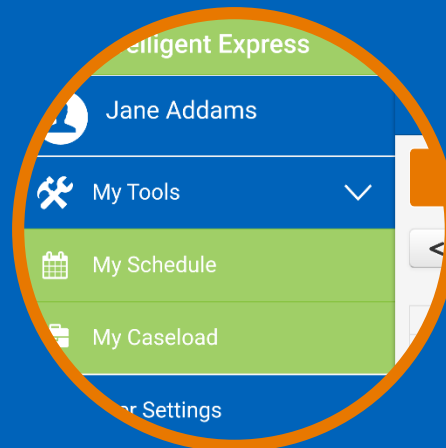

Client Features

Welligent Express offers a range of client functionality, also available in offline mode. Our mobile EHR gives you all the tools to properly manage your caseload on the go with the ability to:

- Search for existing clients that are part of your caseload
- Add new clients
- Add and edit client records, including basic and extended demographics, as well as intake and discharge information
- Add and edit client pay sources
- Add and edit client contacts
- Add and edit client medications
- View client attachments
- Add and edit assessment tools

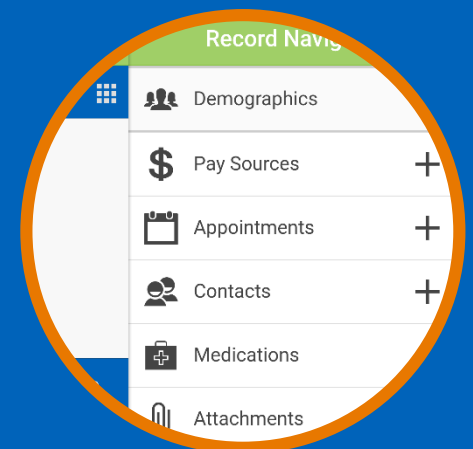

Event Features

With Welligent Express, you can easily download your caseload for the day and switch to offline mode. Once in the field, you can do many of the activities available in the full desktop application such as:

- View events and appointments calendar (day/month/week)
- Schedule new and edit existing events and appointments
- Complete and sign existing events and appointments
- View and edit your existing caseload
- Access your recent clients

Mobile Security

Whether you're on the go or at your desk, your Welligent Express data is always accessible, safe and secure. Welligent Express completes user authentication through SSL utilizing the same login credentials as our desktop EHR. Our app complies with HIPAA regulations, and auto-signoff parameters are designated based on your organization's standards.
