welligent

Part of the **Continuum**Cloud

Home + Community Manager for
Group Homes + IDD

Simple Tools for Today's Complex IDD Needs

Welligent's easy to use, cloud-based EHR, was created to simplify and facilitate the unique needs of IDD services all in one comprehensive and simple application.

Welligent's Home and Community Manager improves client documentation and tracking in group home settings, ICFs, supported living, shared living, or other long-term residential care programs.

Comprehensive Vocational and Day Treatment documentation tools provide a more holistic approach to supporting clients in various settings over the long term.

Key Features:

📱 **Cloud-based application that allows your clinicians to document on-the-go**

🏠 **Track clients in any residential setting**

👥 **Track vocational programs**

📝 **Document day treatment in groups or clubhouse settings**

"

What impressed me the most about working with Welligent was their personal touch and accessibility.

Chris Howard, IT and EHRS Director
Foothill Family, Utah

Handle Documentation with Ease Wherever You Are

Documenting is easy with Welligent Express. Complete notes, ADLs and eMAR easily from your mobile device and sync to the cloud later. Like all of our solutions, it's HIPAA compliant and secure.

The Capabilities You Need All in One Place

Welligent Home + Community Manager allows you to do everything from behavior and ADL tracking to flexible shift notes and incident documentation.

→ Ability to search for homes to match client's special needs

→ Comprehensive staffing and shift management tools to ensure you're meeting contractual requirements

→ Track and print daily activities for each resident including individual services, goal achievement and external appointments

→ Robust eMAR capabilities including configurable missed medication alerts and reminders

→ Incident reporting and notification with conditional logic to meet compliance requirements.
