

## Mobile Care Made Easier

# Welligent Express

### True Mobile Care

Welligent Express, a mobile-optimized application for iOS, Android and Windows 10, contains the most-used features of our desktop platform designed for managing client care in the field. Whether you're at a hospital, group home, school setting, or out in the community, the data you enter in the field is secure and can be synced with your Welligent EHR the next time you're connected.

### Secure + Compliant

Welligent Express completes user authentication through SSL utilizing the same login credentials as our desktop EHR and complies with all HIPAA regulations.

Your data is encrypted at rest and in transit.

Welligent Express has supported our clinicians' productivity in our Community Based Programs. We've been able to decrease documentation time and manage our clients better in the field.

Matt Welser, Innovative Technology Analyst  
Pinebrook Family Answers

### Works on All Major Mobile Platforms

iOS

Android

Windows 10

# Experience Welligent Express

A mobile optimized version of our EHR, Welligent Express gives you online/offline access to:

- Caseload
- Scheduling
- Session Notes
- Medications
- Apps available on Apple, Android, and Windows 10 platforms

→ View treatment plans

→ Obtain client signatures

→ Complete screening assessments

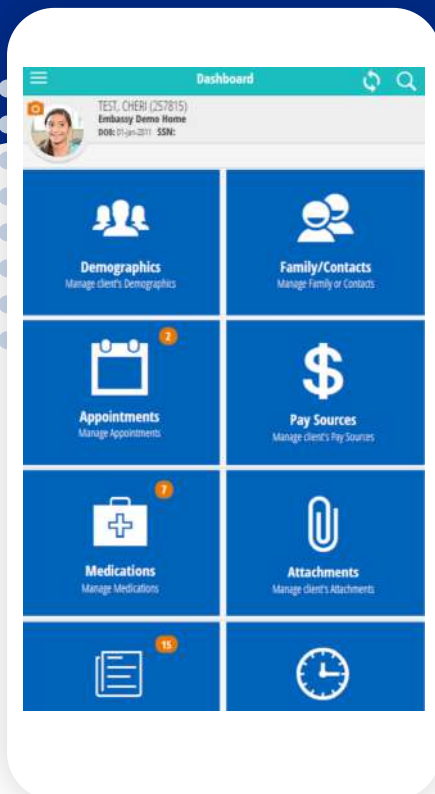

→ Take pictures and upload attachments

## No WiFi? No Problem.

Access client records, forms, medications, and pay sources all without an internet connection.

Document your notes as usual and sync your data the next time you have internet access.

### Convenient

Capture data, schedule appointments, review treatment plans anywhere, anytime.

### Truly mobile

Welligent Express can be synced as soon as you are accessible to WiFi ensuring your information is saved and synced to the cloud.

### Efficient

Clinicians have faster access to information in the field and in-practice while providing care.
