

An EHR Tailor-Made for Foster Care Services

The Features You Need to Make Foster Care Services Easier

Welligent’s easy to use comprehensive EHR allows foster care service organizations to manage all functions from one platform—anywhere, anytime. Our cloud-based platform allows your users to work on their tablet or desktop internet browsers.

The interface was created for easy on-boarding and an intuitive user experience to maximize your user’s time, so they can focus on quality care.

One comprehensive system allows you to manage administrative tasks, track recruitment of foster parents, perform parent/child matching, complete home studies, and track foster parent documentation and certification processes even when kids change homes.

Together with Welligent, we have been able to create a clinical record, a workflow, and a communication system that supports our direct service staff in providing timely, individualized, needs-based and outcome-driven services.

Elena Judd, Clinical Director
Uplift Family Services, California

Key features:

Track calls + record home details

Complete screening tools + required forms

Set parent, home, + child preferences

Search complex criteria for appropriate child-home matching

Track parent payments

Manage the Recruitment Process By Tracking Calls, Completing Assessments, and Ensuring a Match Between Parents and Foster Child

Capture and record foster parent details and foster home information to maintain compliance requirements.

- Create a complete electronic health record for foster children
- Engage foster parents using Welligent's Foster Parent Portal
- Pay parent stipends directly from the Welligent system

Welligent's Foster Parent Portal increases Parent engagement. Parents can:

- View Treatment Plan, Alerts, and Level of Care
- Record Notes, eMAR, and Incidents
- Review Home Compliance Checklists and Daily Census

Easy

Our intuitive user interface improves system adoption and keeps your clinicians focused

Comprehensive

Improve your recruitment process, home compliance requirements, foster parent details, comprehensive health record, and parent engagement

Compliant

HIPAA compliant and up to date with state and federal regulations to help your team focus on creating optimal outcomes
